We are currently looking for 1 ED liaison in each department throughout the state. This program is designed to assist the state with communication at the local level. In agreeing to be a liaison, we ask that you disseminate information that we send to you in regards to state activities throughout your department either via e-mail, poster, presentation at a staff meeting, or any other manner which you choose.

This may include information in regards to membership opportunities, legal activities within the state, or voting items at the state/national level. In the past we have attempted to contact members via e-mail and regular mail, very often with a limited response. Our hope is to help communicate with all members throughout the state by utilizing this program.

In addition to being a liaison, opportunities are available on the state membership committee. We are looking for 5 members to help with communicating to members that are about to expire, and to be an additional resource for new or prospective members. If you are interested in this, please let me know.

Thank you in advance for your time and interest in the Emergency Nurses Association.
